

ELEMNT BOLT

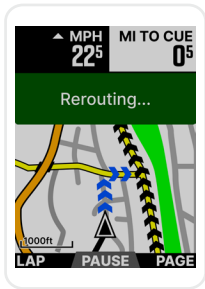

gps bike computer

ADVANTAGE BY DESIGN

ELEMNT COMPANION APP

The free ELEMNT Companion App uses the intuitive interface of your smartphone to customize your settings, rider profile, create routes, and link ELEMNT BOLT to your favorite cycling apps and wireless sensors.

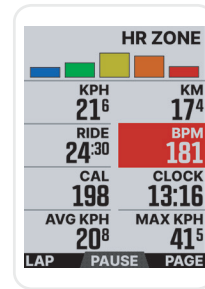

SMART NAVIGATION

Allows you to create a route with turn-by-turn directions by simply selecting a location directly on the ELEMNT BOLT map page using pan and zoom, or by selecting from one of your saved locations. Find the most direct course, and automatically get rerouted back on course.

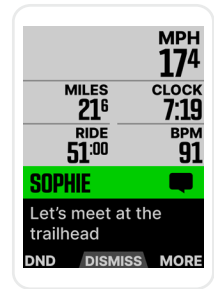

QUICKLOOK LEDS

Quicklook LEDs provide a clear way to quickly monitor your power, heart rate, speed, turn-by-turn directions and other notifications.

64 COLOR SCREEN

Vibrant 2.2" 64 Color Screen makes seeing your data and routes easier than ever.

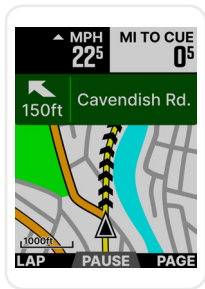

TEXT AND PHONE NOTIFICATIONS

Receive call, text, WhatsApp, and email notifications mid-ride (or turn them off in Do Not Disturb mode.)

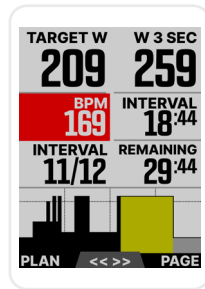

STRAVA LIVE SEGMENTS

Integrates with Strava Live Segments to alert you before the segment begins, display progress status for your goal and give a unique Final Push when you are close to hitting a PR or taking that KOM!

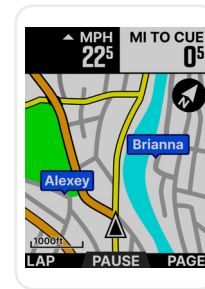

TURN-BY-TURN

Get on-screen directions and scrolling LED turn directions or use Take Me To feature that generates a cycling optimized route with turn-by-turn cues and elevation details on the Climbing Screen.

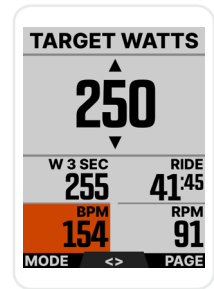

PLANNED WORKOUTS

Planned workouts automatically sync to your ELEMNT and send notifications at each interval. Comes pre-loaded with three Team INEOS Grenadiers structured workouts and two FTP tests. Works on the road or controls your smart trainer.

LIVE TRACKING

Locate friends or other ELEMNT users with real-time location on map screen or share your location with friends by text or email.

KICKR CONTROL

Pairs with KICKR BIKE and KICKR Smart Trainers to allow you to train in four different modes: Route simulation, ERG, Level, or Passive to just record your workout controlled by another app.
