**NEW SOFTWARE
FEATURES**

**OUTDOOR WORKOUTS WITH WAHOO X
SUMMIT SEGMENTS
PUBLIC ROUTE SHARING**

THE ACCURACY TO EXPLORE

(NEW) DUAL BAND GPS

Confidence when exploring comes with knowing exactly where you are. ELEMNT ROAM's Dual Band GPS provides this confidence by enhancing accuracy in challenging environments where signals can be obstructed by dense trees and urban noise.

(NEW) 64 COLOR SCREEN

With a 64-color screen, ELEMNT ROAM offers more ways to keep you focused on how you're performing and where you're headed. From color-coding tough climbs ahead to highlighting the efforts in your chosen structured workout, ELEMNT ROAM uses color intelligently to keep focused on the ride.

SMART NAVIGATION

ELEMNT ROAM's smart navigation features give you the freedom to explore with confidence by allowing you to navigate on the fly from the device.

THE POWER TO ADVENTURE

(NEW) SUMMIT SEGMENTS

Summit Segments not only brings a world of color to climbs throughout your ride, but allows you to see all the upcoming climbs along your preloaded route, so you can take on a new challenge or push for a PR on an old favorite.

(NEW) 32GB OF MEMORY

There's no such thing as too many adventures with ROAM's expanded 32GB memory. Increase your number of saved routes, detailed maps and structured workouts to provide any type of adventure, anytime.

17-HOUR BATTERY

No matter how powerful your computer is, it won't do you much good if it doesn't have power. With 17 hours of battery life, ROAM packs the most power in the ELEMNT family of GPS bike computers, giving you a week full of rides without the need to recharge.

THE FREEDOM TO CONNECT

(NEW) SYSTEM OUTDOOR WORKOUTS

ELEMNT ROAM uses Wahoo X to keep you ready for year-round adventures by allowing you to follow structured training plans on indoor and outdoor rides. Just load a workout or training plan into your SYSTM calendar and follow the targets set by the Wahoo Sports Science team to maximize efforts regardless of your training environment.

MULTISPORT HANDOVER

ELEMNT ROAM simplifies life for multisport athletes by automatically syncing relevant performance data between ELEMNT ROAM and the ELEMNT RIVAL GPS sport watch. This seamless data handoff keeps data in front of you when you switch to a bike leg, keeping your focus on your performance and the adventure in front of you.

KICKR CONTROL

ELEMNT ROAM works seamlessly with the entire Wahoo ecosystem, and that includes giving you control over all KICKR smart bikes and smart trainers. Whether you want to knock out a simple ERG workout, relive a past ride or recon an upcoming route, ELEMNT ROAM will control KICKR's resistance at every stage of the workout or route.
